---

Hello Mr. Tickner,

In response to the letter sent from NPC on March 26th, 2014, QIA offers the following response.

QIA believes NPC's questions to QIA do not take into account the events of the formal review process following QIA's January 10th, 2014 letter.

QIA therefore directs NPC to the following pieces of information (all attached to this email).

Item #1 - Exhibit #51 from NIRB Final Hearings

This exhibit was filed through joint submission of QIA and the proponent in relation to the requirement for Caribou Protection Measures, as per Appendix I of the North Baffin Regional Land Use Plan.

Item #2 - An email record to NPC filing copy of QIA and the proponents joint submission in relation to the requirement for Caribou Protection Measures, as per Appendix I of the North Baffin Regional Land Use Plan.

Item #3 - NIRB Hearing Transcripts.

Here QIA directs NPC to pages 737-740 whereby the requirement for caribou protection measures was discussed on the NIRB record.

QIA believes a review of these documents would assist in clarifying for NPC the questions you have posed to QIA in correspondence of March 26th, 2014. Of particular note is the following statement from QIA and the proponents joint submission of January 29th, 2014:

*"Further to its January 10th correspondence, QIA wishes to now confirm to the NPC that the ERP fully complies with the requirements of Appendix I of the North Baffin Regional Land Use Plan."*

QIA welcomes any questions the NPC may have on this topic.

Regards, Stephen
