Chapter 1: Introduction

1.1 Context

The Nunavut Planning Commission (NPC) is preparing a land use plan to guide and direct resource use and development in the Nunavut Settlement Area (NSA). As part of its efforts, the NPC is facilitating discussions in each Nunavut community on land use and resource management issues. Information that is obtained from these discussions will be used to inform decisions regarding the further development of the Nunavut Land Use Plan (NLUP).

1.2 Purpose

This report presents information obtained during the NPC’s visit to the community of Whale Cove. The purpose of the report is to inform discussions regarding the further development of the NLUP, ensuring that the plan reflects the priorities and values of residents.

It is important to note that the information contained in the Community Report will be considered in conjunction with all other feedback when revising the NLUP.

1.3 Methodology

Information was presented to and received from participants in Whale Cove in accordance with the Nunavut Planning Commission’s Community Engagement Strategy (Engagement Strategy). The Engagement Strategy provides for the following methods for presenting and receiving information:

- **Open house**: information contained in the Draft Nunavut Land Use Plan (DNLUP) was presented on 7 multi-lingual large format poster boards. Participants were encouraged to review the posters, ask questions and provide feedback. Comments and questions were recorded by NPC staff and are contained in Appendix 1.

- **Elected Officials Meeting**: The NPC Chairperson and NPC staff met with senior and elected officials in the community. The development process for the DNLUP, its content and next steps were presented.

- **Public Workshop**: A formal presentation of the Draft Plan content was provided to participants, including a slide overview of its content. Following the presentation, questions and comments were received from participants. The questions, comments and responses are contained in Appendix 3.

- **Wrap Up Session**: Staff was available to discuss the areas identified during the mapping and identify any additional issues or areas of interest. Information received during this session was recorded by NPC staff and is included in Appendix 5.

Areas that participants identified during mapping sessions as important to a particular goal have, in the majority of cases, been included in this report as they were recorded. In instances where participants identified an area that was better suited to another goal, the area has been reclassified to the more suitable goal and has been verified as appropriate to do so by the Community.

A follow-up meeting was held on April 23, 2014 to review a draft version of this report with the Hamlet Council, Hunters and Trappers Organization (HTO) in September 2012. In addition, letters of invitation were sent to the Whale Cove Mayor and Council and HTO in advance of the NPC’s visit to advise of the meetings and to encourage participation. Follow up phone calls were also made.

Public notice of the various events was provided in the following ways:

- **Nunatsiaq News and Nunavut News/North**: notice of community meetings were posted in both newspapers a minimum of 45 days in advance.

- **Co-op cable TV**: notice of community meetings was run a minimum of 45 days in advance for one week and run again for no less than 14 days before the meetings.

- **Community radio**: notices were read by the hosts and a live interview with the Commission Chairperson was conducted.

- **Community bulletin boards**: notices were posted on bulletin boards around the community 45 days and again 14 days in advance of the meetings.

- **Community mail drop**: one page flyers that announced the meetings and their purpose were delivered to the post office in each community for all mail boxes that accept unaddressed ad-mail.

- **nunavut.ca**: the schedule of community visits, the Draft Plan, and all supporting information was available on the Commission’s website.

1.4 Public Awareness

The NPC raised public awareness regarding its visit to Whale Cove in accordance with the Engagement Strategy. The DNLUP and supporting materials were mailed to the Mayor and Council of Whale Cove, the Hunters and Trappers Organizations (HTO) in September 2012. All events occurred as scheduled. The sessions were attended as follows;

- **Elected Officials Meeting**: the Mayor and members of the Hamlet Council and HTO attended the elected officials meeting.

- **Open house**: approximately 15 people attended the open house to review the Draft Plan.

- **Public Workshop**: approximately 65 people attended the presentation of the DNLUP and facilitated mapping sessions. Information was recorded in three separate mapping groups.

- **Wrap Up Session**: approximately 10 people attended the wrap up session.

Summary of Community Meetings – Whale Cove, November 4-5, 2013

The Commission visited the community on November 4-5, 2013. All events occurred as scheduled. The sessions were attended as follows;

- **Elected Officials Meeting**: the Mayor and members of the Hamlet Council and HTO attended the elected officials meeting.

- **Open house**: approximately 15 people attended the open house to review the Draft Plan.

- **Public Workshop**: approximately 65 people attended the presentation of the DNLUP and facilitated mapping sessions. Information was recorded in three separate mapping groups.

- **Wrap Up Session**: approximately 10 people attended the wrap up session.

Figure 1. Location of Whale Cove
Chapter 2: Protecting and Sustaining the Environment

Protecting and Sustaining the Environment was one of five topics presented to and discussed by participants during the Open House, Elected Officials Meeting, Public Workshop and Wrap up Session, collectively referred to in this document as information sharing and gathering sessions.

2.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Protecting and Sustaining the Environment.

- Key bird habitat sites
- Caribou Habitat sites
- Atlantic Cod Lakes
- Cumulative Impacts
- Transboundary considerations
- Climate change

The importance of these issues and areas to Protecting and Sustaining the Environment was not disputed by participants during the information sharing and gathering sessions.

2.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Protecting and Sustaining the Environment during the information sharing and gathering sessions. These additional areas are:

- Fishing areas
- Caribou habitat
- Muskox habitat
- Bird habitat
- Seal habitat
- Whale habitat

2.3 Areas of importance to Protecting and Sustaining the Environment

Areas and issues discussed during the information sharing and gathering sessions as important to Protecting and Sustaining the Environment are illustrated on Map 1, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 1 are considered by the Community to be important to Protecting and Sustaining the Environment.
- In these areas, the community would like the NLUP to encourage activities that support environmental protection and management needs, including wildlife conservation, protection and management.

This feedback will be considered in conjunction with all other feedback when revising the DNLUP.
Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.
Chapter 3: Encouraging Conservation Planning

Encouraging Conservation Planning was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

3.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Encouraging Conservation Planning:

- National Parks Awaiting Full Establishment
- Proposed National Parks
- National Marine Conservation Areas
- Thelon Wildlife Sanctuary
- Migratory Bird Sanctuaries
- National Wildlife Areas
- National Historic Sites
- Territorial Historic Sites
- Heritage Rivers

The importance of these issues and areas to Encouraging Conservation Planning was not disputed by participants during the information sharing and gathering sessions.

3.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Encouraging Conservation Planning during the information sharing and gathering sessions. These additional areas are:

- Historic sites
- Fishing areas

3.3 Areas of importance to Encouraging Conservation Planning

Areas and issues discussed during the information sharing and gathering sessions as important to Encouraging Conservation Planning are illustrated on Map 2, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 2 are considered by the Community to be important to Encouraging Conservation Planning.
- In these areas, the community would like the NLUP to encourage activities that support environmental protection and management needs, including wildlife conservation, protection and management.

This feedback will be considered in conjunction with all other feedback when revising the DNLUP.
Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as laid out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

For Data Sources see Draft Nunavut Land Use Plan (DNLUP). Areas identified by community collected as part of the Nunavut Planning Commissions Community Engagement Strategy during the Mapping Sessions for the DNLUP on November 4 & 5, 2013. Maps were digitized at the Nunavut Planning Commission.

To be used for illustration purposes only as part of the Draft Nunavut Land Use Plan Consultation Process.

May-28-14
Building Healthier Communities was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

4.1 Areas presented to participants
During the information sharing and gathering sessions, participants were presented the following areas and issues as important to Building Healthier Communities:

- Areas of Community Interest
- Community Land Use
- Transportation Infrastructure
- Unincorporated Communities
- Alternative Energy Sources
- Community drinking water supplies
- Land remediation
- Northern Contaminated Sites Program
- Aerodromes
- Canadian Forces Station
- Northern Warning System sites

The importance of these issues and areas to Building Healthier Communities was not disputed by participants.

4.2 Areas identified by participants
Additional areas and issues were identified by participants as important to contributing to the goal of Building Healthier Communities during the information sharing and gathering sessions. These additional areas are:

- Contaminated sites
- Sacred areas

4.3 Areas of importance to Building Healthier Communities
Areas and issues discussed during the information sharing and gathering sessions as important to Building Healthier Communities are illustrated on Map 3, including areas identified in the DNLUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 3 are considered by the Community to be important to Building Healthier Communities.
- In these areas, the community would like the NLUP to encourage activities that support community needs and cultural priorities.

This feedback will be considered in conjunction with all other feedback when revising the DNLUP.
Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as laid out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.
Chapter 5: Encouraging Sustainable Economic Development

Encouraging Sustainable Economic Development was one of five topics presented to and discussed by the participants during the information sharing and gathering sessions.

5.1 Areas presented to participants

During the information sharing and gathering sessions, participants were presented with the following areas important to Encouraging Sustainable Economic Development:

- Mineral Exploration and Production
- Oil and Gas Exploration
- Commercial Fisheries

The importance of these issues and areas to Encouraging Sustainable Economic Development was not disputed by participants during the information sharing and gathering sessions.

5.2 Areas identified by participants

Additional areas and issues were identified by participants as important to Encouraging Sustainable Economic Development during the information sharing and gathering sessions. The additional areas identified are:

- Commercial fisheries
- Lodges (camping, sports hunting, fishing)

5.3 Areas of importance to Encouraging Sustainable Economic Development

Areas and issues discussed during the information sharing and gathering sessions as important to Encouraging Sustainable Economic Development are illustrated on Map 4, including areas identified in the DNUP and areas identified by the community. Scanned images of the maps on which community feedback was recorded can be found in Appendix 4.

Based on discussions with participants, the NPC understands that:

- The areas identified on Map 4 are considered by the Community to be important to Encouraging Sustainable Economic Development.
- In these areas, the community would like the NLUP to encourage activities that support economic opportunities and needs.

This feedback will be considered in conjunction with all other feedback when revising the DNUP.
Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as laid out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.
6.1 Areas identified in the Draft Plan

The DNLUP identifies areas important for a variety of uses. These areas were presented to participants during the workshop as Mixed Use Areas. These areas, as they occur around the community, are illustrated on Map 5.

6.2 Areas identified by participants

No additional areas were identified as Mixed Use by participants. However, some areas identified as Mixed Use in the DNLUP were considered by participants to require additional protection because of their particular qualities. These areas and the goals they are important for are identified on Map 6.
Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as layed out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

For Data Sources see Draft Nunavut Land Use Plan (DNLUP). Areas identified by community collected as part of the Nunavut Planning Commissions Community Engagement Strategy during the Mapping Sessions for the DNLUP on November 4 & 5, 2013. Maps were digitized at the Nunavut Planning Commission. To be used for illustration purposes only as part of the Draft Nunavut Land Use Plan Consultation Process.
Additional PSE Goal areas identified during community consultations

Additional BHC Goal areas identified during community consultations

Goal areas discussed during community consultations represent the generalized goal areas presented from the Draft Nunavut Land Use Plan (DNLUP). Goal areas do not represent specific designations and recommendations as laid out in the DNLUP. For more information on these areas please refer to the DNLUP and the Options and Recommendations document. Information collected in communities will be considered in conjunction with all other feedback when revising the DNLUP and will be part of the Consultation Record.

For Data Sources see Draft Nunavut Land Use Plan (DNLUP). Areas identified by community collected as part of the Nunavut Planning Commissions Community Engagement Strategy during the Mapping Sessions for the DNLUP on November 4 & 5, 2013. Maps were digitized at the Nunavut Planning Commission.

To be used for illustration purposes only as part of the Draft Nunavut Land Use Plan Consultation Process.

Projection: Canada Lambert Conformal Conic, NAD83
Produced by the Nunavut Planning Commission (867) 983-4625, npc@nunavut.ca
December-09-13
7.1 Areas identified for multiple goals

All areas discussed with the community as important for a particular goal are shown on Map 7. In some instances, areas have been identified as important for multiple goals. These areas, and the specific goals they are important to, are also shown on Map 7. In these areas, the NPC will take all of the identified goals and all other feedback into consideration when revising the DNLUP.
Areas identified by community collected as part of the Nunavut Planning Commissions Community Engagement Strategy during the Mapping Sessions for the DNLUP on November 4 & 5, 2013. Maps were digitized at the Nunavut Planning Commission.

To be used for illustration purposes only as part of the draft Nunavut Land Use Plan consultation process. Produced by the Nunavut Planning Commission (NPC), 02/12/2013.
During the open house, participants raised the following issues:

- Concerned about oil and gas development
The elected officials meeting was attended by the Mayor and members of the Hamlet Council and HTO. During the meeting, participants raised the following issues:

- Concerned about low flying helicopters disturbing caribou
- It was rare to see polar bears in the summer. There never use to be polar bears in Arviat. Animals migrate back and forth. Animals are not as numerous as they used to be. Iqaluit IQ is very useful to identify how or when animals will be present.
- I support exploration camps that put our young people to work. It appears to be the only stable economy right now.
During the community workshop, there was a question and answer period, which included a discussion of the following topics:

- Requesting clarification on the 1970’s exploration of minerals and oil and its connection to the current land use plan.
  - The Commission answered that the moratorium on oil and gas from the 1970’s that is in the Keewatin Regional Land Use Plan is not included in the Draft Nunavut Land Use Plan.
Appendix 4:
Community Workshop Scanned Maps

Two groups completed the mapping session to identify important areas. This Appendix contains the maps that were used by participants to identify areas that are important to the following land use planning goals:

- Protecting and Sustaining the Environment
- Encouraging Conservation Planning
- Building Healthier Communities
- Encouraging Sustainable Economic Development
- Mixed Use

Also included on each map is a reference table that includes the specific values that were identified for the area.

Note: The documented comments for Group 2 were not verified with an audio recording.

During the mapping portion of the community workshop, the following concerns were raised that did not apply to a specific area that was identified on the maps:

- Concerned about helicopters disturbing caribou near mining camps. In particular, the area across the bay from Whale Cove called Anowtalik.
- All lakes should be protected.
- Caribou are important but are difficult to pinpoint because they are always moving. Wolves can be found where the caribou are.
- Concern that caribou haven’t been seen in the area for 2 years. These used to be a big herd that passed close by Whale Cove. There are low level flying choppers going to worksites daily.
- From Group 3: Areas on PSE map are important for BHC too. The areas I value most are the lakes that we’ve talked about on the PSE map, the fishing areas. Same for Drinking water.

Building Healthier Communities

Community Land Use identified from NPC Use and Occupancy mapping sessions:

- Light Grey: Urban Outliers
- Red Background: Residential
- Blue Brackish: Commercial/Industrial

Specific Areas of Concern:

- Areas of good drinking water, this should see no development.
- C101: Large area in good drinking water.
- C102: Hooda drinking water, should have no development.
- C112: Pollution.
- C113: Proposed exploration camp is contaminated, should be cleaned up.
- C114: Wasting Point area are concentrated sites, needs to be looked at for possible contamination.

Specific Recommendations:

- C180: Dump area left behind years ago by exploration companies at both locations.

Legend:

- Light Grey: Urban Outliers
- Red Background: Residential
- Blue Brackish: Commercial/Industrial
- Light Black: Extremely Significant Use

MU41 Seals and whales in the area.
MU42 Seals, a lot in the fall.
A small group of participants returned to identify additional important areas during the wrap up session.

During the wrap up session, the following concerns were raised that did not apply to a specific area that was identified on the maps:

- Elders when growing up tell us to be very careful not to abuse the caribou or do something to their area (calving grounds). If so, they don’t come back in future. If we don’t stop exploration companies now there will be no caribou 30-40 years down the road.

- There is no winter commercial fishery.

- Polar bears come up this coast from James Bay area and they migrate on the shores of Hudson until end of November of each year. They come along this route in March for southbound migration. They come through Whale Cove each migration twice a year.

- Beluga whales all the way up the coast every summer and Whale Cove is a major Beluga Whale habitat site. They migrate further up the coast later in season.

- The three big lakes are important for fishing. Not used for commercial but for personal fishery.

Whale Cove people especially via Ferguson River in summer months, they commercial fish there for Arctic Char. That should be protected. Whale Cove people fish, it contaminated by oil, etc., would spoil area. Protect from explorations.

NPC Regional Map Series
The NPC returned to the community and reviewed a draft version of this report with the Hamlet Council, Hunters and Trappers Organization, and the Community Lands and Resource Committee. The meeting included:

- A presentation of a draft version of this report
- An overview of the mapped information that was recorded for each topic:
  - Protecting and Sustaining the Environment
  - Encouraging Conservation Planning
  - Building Healthier Communities
  - Encouraging Sustainable Economic Development
  - Mixed Use
- General discussion and comments including:
  - Opportunities to provide additional comments.
  - Would like better notifications on when sport hunters are in Whale Cove areas of interest.
  - Would like other communities to inform the Hamlet of Whale Cove and HTA to be informed about sport hunting activity.
